PROFESSIONAL SUMMARY

Microsoft Certified Power BI Data Analyst with **9+ years** of experience in BI development, sales analytics and insurance reporting. Built the complete reporting and analytics setup for Policybazaar's **Health Feet-on-Street (FOS)** sales channel from its launch, supporting its growth from zero to **₹110 Cr+ in monthly business**. Serve as the single data partner for a **2,100+ member sales organisation**, from 1,900 advisors to the Sales Head. Strong in Power BI (DAX, Power Query/M, data modeling, RLS), SQL Server, Advanced Excel, AWS Athena and Python, currently upskilling in Generative AI, with a track record of turning raw data into automated dashboards that leadership uses for daily decisions.

KEY ACHIEVEMENTS

- **0 to ₹110 Cr+ per month:** Joined Policybazaar's Health FOS channel at launch and built its data and reporting foundation from scratch as the business scaled to ₹110 Cr+ in monthly business.
- **2,100+ stakeholders served:** Single point of contact for data across 1,900 advisors, 150 Team Leaders and 50+ AZMs, ZMs, Managers, Senior Managers and the Sales Head.
- **1,700+ corporate clients:** Led Power BI development at Raksha Health Insurance TPA, delivering automated reporting for 1,700+ corporate clients and 18+ insurance companies.
- **Recognition:** Received multiple On-Spot Awards for delivery and contribution to project teams.

CORE COMPETENCIES & TECHNICAL SKILLS

Power BI: Power BI Desktop • Power BI Service • DAX • Power Query (M) • Data Modeling • Star Schema • Snowflake Schema • Fact & Dimension Tables • Relationships & Cardinality • Measures & Calculated Columns • Time Intelligence • Filter & Row Context • Row-Level Security (RLS) • Drill-down & Drill-through • Bookmarks & Tooltips • Import / DirectQuery • Incremental Refresh • Scheduled Refresh • Data Gateway • Workspaces & Apps • DAX Studio • Performance Optimization • KPI Dashboards

SQL Server: T-SQL • SSMS • Joins • Subqueries • CTEs • Window Functions (ROW_NUMBER, RANK, LAG/LEAD) • GROUP BY & Aggregations • CASE Statements • Stored Procedures • Views • Temp Tables • Indexing • Query Optimization • Data Cleaning • AWS Athena (Presto SQL)

Python: Pandas • NumPy • Data Cleaning & Transformation • Data Wrangling • Excel / CSV Automation • Report Automation • SQL Connectivity (pyodbc / SQLAlchemy) • Jupyter Notebook

Advanced Excel: Power Query (Excel) • Power Pivot • Pivot Tables & Pivot Charts • XLOOKUP / VLOOKUP / HLOOKUP • INDEX-MATCH • SUMIFS / COUNTIFS / AVERAGEIFS • IF / IFS / Nested Logic • Dynamic Arrays (FILTER, UNIQUE, SORT) • Text & Date Functions • Conditional Formatting • Data Validation • Slicers & Interactive Dashboards • What-If Analysis • Macros & VBA • Google Sheets (QUERY, IMPORTRANGE)

Data & Cloud: ETL • Data Warehousing • Data Pipelines • AWS S3 • AWS Athena • Data Integration • Data Quality & Validation

Generative AI *(upskilling)*: Prompt Engineering • ChatGPT • Claude • Microsoft Copilot (Excel & Power BI) • AI-assisted SQL, DAX & Python Coding • LLM Fundamentals • AI-driven Report Automation • AI-powered Data Insights

Business: KPI Design • Sales & Funnel Analytics • Conversion Analysis • Advisor Productivity Tracking • Ad-hoc Analysis • Requirement Gathering • Stakeholder Management • SDLC • UAT

Domain: Health Insurance • Insurance Distribution • Feet-on-Street (FOS) Sales • Corporate Health Insurance (TPA)

CERTIFICATIONS & LEARNING

- **Microsoft Certified: Power BI Data Analyst Associate (PL-300)** — Microsoft
- **Generative AI for Data Analytics** — currently upskilling in prompt engineering, LLM fundamentals and AI-assisted SQL, DAX and Python development

PROFESSIONAL EXPERIENCE

Senior Data Analyst / Power BI Developer — **Policybazaar**, Gurgaon Jan 2022 – Present

Health Insurance · Feet-on-Street (FOS) Sales Channel

- Built the Health FOS channel's reporting and analytics setup from day one and own it end to end for a **2,100+ member sales team** as the business scaled to **₹110 Cr+ per month**.
- Designed and automated Power BI dashboards tracking leads, appointments, bookings, conversions, APE and advisor productivity at every level, from individual advisor to zone and national view.
- Built ETL pipelines combining SQL Server, AWS Athena (S3), Excel and Google Sheets into a single star-schema data model for consistent, reliable numbers.
- Implemented Row-Level Security so each advisor, TL, manager and zonal head sees only their own team's data from a single shared report.
- Automated recurring data cleaning and reporting tasks with Python (Pandas), replacing manual Excel work and reducing errors.
- Act as the go-to problem solver for sales leadership: translate business questions into ad-hoc analysis and resolve data issues quickly.
- Tuned DAX measures, SQL queries and data models (using DAX Studio) to improve dashboard refresh speed and performance.

Key Projects

- **FOS Conversion Tracking Suite:** Built Same-Day Pure, Daily Impure and Segment-wise / Team-wise Conversion reports, giving leadership a daily view of lead-to-booking conversion across every team and segment.
- **Lead, Appointment & Booking Funnel:** Developed Lead Dashboard, Appointment Trend (FOS) Report and Booking Dashboard, giving a complete funnel view from lead to policy booking.
- **APE & Target Achievement Tracking:** Built Team-wise APE Contribution and Monthly Achievement reports to track target vs. actual for every advisor, TL and manager.
- **Fresh Sourcing, No-Cost EMI & Chat Team Reports:** Created Fresh Sourcing (Health + Add-on), No-Cost EMI and Segment-wise Chat Team reports to monitor new business, payment-option adoption and chat team performance.

Data Analyst / Power BI Developer — **Raksha Health Insurance TPA Pvt. Ltd.**, Faridabad May 2019 – Jan 2022

Corporate Health Insurance · Third-Party Administration

- Led Power BI development for the reporting team, owning estimation, planning and delivery of reports and dashboards.
- Developed and automated Power BI reports for **1,700+ corporate clients** and **18+ insurance companies**.
- Built complex reports, dashboards and DAX measures with drill-down capabilities for sales, service and client teams.
- Integrated and transformed health insurance data from SQL Server, Excel and Google Sheets using Power Query into client-ready reports.
- Standardised varied health data formats from insurers into a common structure, enabling faster and more accurate reporting.
- Gathered requirements with business and sales teams and supported testing through SIT and UAT before deployment.

MIS Executive — **Anjani Metals**, Faridabad Mar 2017 – May 2019

- Built and maintained Advanced Excel MIS reports to track and improve aluminium production output and efficiency.
- Delivered sales and production reports in Excel and Google Sheets that supported management decisions.
- Automated daily MIS using advanced formulas (SUMIFS, INDEX-MATCH, VLOOKUP), pivot tables and macros, cutting manual report preparation.
- Ensured accurate record-keeping and smooth data flow across production and sales teams.

EDUCATION

Bachelor of Science (Chemistry) — Veer Kunwar Singh University, Ara, Bihar 2013 – 2016
